

Wireless Button Press Sensors

Wireless Button Press Smart Sensors

Button Up Service & Sensor Networking

Need help providing swift customer service or deploying a large-scale sensor network? Instant alerts from Alegna's Wireless Button Press Sensor support you by streamlining sensor deployment and expediting customer service requests.

Upon pressing the sensor's button, a notification is sent to AlegnaSense™ Management Software Platform. An on-sensor LED confirms software response, and an alert is issued via text, email, or call. Front-desk and custodial personnel can be instantly notified if a restroom needs maintenance; engineers and facility managers use the sensor to evaluate installation sites and validate sensor performance.

Sizing Up Service

Given its popularity among hospitality, healthcare facilities, and multinational enterprises, the sensor is available in an ultra-compact CC sensor, conventional AA battery-powered model, or a user-friendly Wi-Fi-enabled sensor.

Find the right fit for your business below with a Wireless Button Press Sensor to expedite customer service or sensor network validation.

Applications

- Customer Service Request Button
- Hotel / Motel Front Desk Call Button
- Service Call Button
- Access Call Button
- Service Verification
- Wireless Sensor Range Tester

Choose the Right Smart Sensor for You!

Commercial AA-battery powered: Our most popular type is ideal for typical commercial & enterprise environments, such as server rooms. A 1,200+ ft. range readily covers most facilities.

CC-battery powered: Compact sensor is great for space-restricted areas such as control cabinets or cold storage.

PoE•X: Power over Ethernet sensors integrate with a building's PoE network; it can also be used with a standard Ethernet infrastructure & powered via an optional AC adapter.

MoWi: This discreet sensor uses your own Wi-Fi for networking and data transmission—popular for smaller businesses and facilities.

Smart Sensors Features & Benefits

Features

- 1200+ ft. Range
- Up to 12 Years of Battery Life
- Automated Data Logging
-

Benefits

- Unbeatable Range Eases Networking
- Dependable, Worry-free Operation
- Streamlined Compliance & Data Analysis
